

Calibration Field Engineer

Job introduction/overview

JPen Medical is an established test and calibration supplier to the NHS, private healthcare providers, residential care and a range of other business sectors which use medical equipment and devices. Established in 2004 we work with over 5000 customers nationally to optimise and maintain medical devices. Our ISO quality accreditations are second to none, and our trusted relationships with leading manufacturers enable reputable high-quality technical knowledge and skill to play a key part in our service. Based in Tamworth, we plan and schedule nationally for our field-based engineers.

Although we have engineers based across the UK, as a national business there will be a requirement to travel. Therefore, a company vehicle & fuel card are provided as well as accommodation & a food allowance should an occasional overnight stay be required.

Job Description:

As a Calibration engineer you will be working at multiple Medical environments on a daily basis, where you will be carrying out the required Test and Calibration on medical devices and will deliver work programmes in line with planning and supervisors instructions in accordance with relevant industry standards.

Minimum Requirements to be considered for this role:

- Full driving licence held for at least 12 months (max 6 points) in accordance with the company transport policy
- You must have an understanding of H&S in the workplace
- You must be self-motivated, driven, customer focused and possess excellent communication skills
- You need to meet the requirements of an enhanced criminal records disclosure. A disclosure request will be made upon offer of employment although a criminal record will not necessarily bar you from obtaining a position.
- You need to be able to meet the physical requirements of the role
- Some experience of field-based work is desirable
- Good computer literacy
- Great attention to detail
- Demonstrate flexibility in working hours to test and calibrate equipment and to provide a service that exceeds customer expectations.
- Be confident to explain to the customer any necessary amendments and adjustments that have been made to the equipment
- No experience of working with medical equipment is necessary as full training will be provided
